**Certificates: Z10523 until Z10547** (total number of certificates = 25)  
Moxa EDS Series Ethernet Switch

Dear Edward Lee,

we are pleased to send you enclosed your above-mentioned certificates.  
You can register your product in the online Product Guide on [www.profibus.com](http://www.profibus.com), if you want. That means, you can do this yourself, if your product is released on the market. This register is free of charge for members of PROFIBUS & PROFINET International (PI).

Furthermore, you have the opportunity to promote your PROFIBUS & PROFINET product in the international newsletter "PROFINews" – which is also free of charge for members of PI. Just send your text in English language together a picture of the product (gif or jpg) to [profinews@profibus.com](mailto:profinews@profibus.com).

PROFIBUS certificates are valid for 3 years (you can find the date of expiry on the certificate). When the validity of a certificate expires, it can be prolonged either with a new test or with a declaration of the manufacturer. Such a declaration may only be used if the device is unchanged, and if the manufacturer informs us within 3 months' time after the date of expiry that he intends to prolong the validity of his certificate. We will then check if all further conditions for prolongation with a manufacturer's declaration are fulfilled.

Yours sincerely  
PROFIBUS Nutzerorganisation e.V.

  
i.A. Anne Dörflinger
